Hypertension can result in damage to veins (varicose veins) and to many of the internal organs and...

### hypertension

### 3.1. CARDIOVASCULAR DISEASE

...can be present without realising it...

...so blood pressure must be checked regularly, as these publibel cards advise

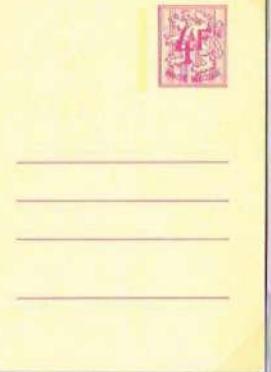

Meter: Francotyp Cm7000/Cm10000

Blood pressure is measured with a sphygmomanometer applied to the arm.

Belgium publibel cards issued from 1933 to 1984, text and pictures provided by the advertiser, Belgian Post then assigns the unique publibel number to each design.  
► French (F) language, preliminary publibel card, with number added before the indicium and other official text and markings are added by Belgian Post  
▼ Flemish/Dutch (N) language final publibel card

BRIEFKAART

Adresster

Public awareness of high blood pressure is essential

1st day of use - 4 dies in use at Edinburgh 29 Apr to 1 May 1996

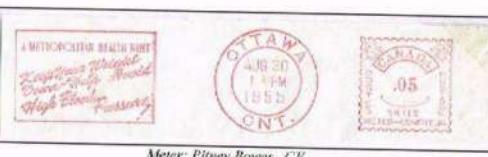

The use of 'la vasculose', a hydrocarbon substance constituting the hard part of plants and practically insoluble, was thought to help regulate blood pressure, as well as regaining youthfulness and detoxifying your body! However, it is more beneficial to prevent hypertension.

### 3.2. POOR LIFESTYLE HABITS

Columbus first observed the native people of the Caribbean smoking tobacco in 1492.

Jean Nicot introduced it to France in 1560, the substance nicotine derives its name from his surname.

The portrait on the issued stamp of Nicot, is actually that of Jan Nicquet a Flemish merchant

Raleigh is generally credited with introducing tobacco into England circa 1585.

By the end of the 19th century smoking had become a "popular addiction". Many countries were now cultivating tobacco, on an industrial scale,

Tobacco plants which ever way you looked!

It was also an economic necessity for the national debt,

With cigarette companies advertising their products

First printed in 1892 by the Government Office under licence of De La Rue by Wiggins Teape & Co.

These cards are the smallest postal stationery ever to be forwarded through the post. They were inserted inside packs of Atlas cigarettes, the buyer was asked to complete the card and return it to Austin Walsh & Co. Scan of reverse on right

But little did people realise how dangerous this plant was. It was seen as a great service to forward cigarettes to troops during WW2, after the success of this scheme in WWI when over 230 million were provided by the British public.

After WW2 and during the 1950s & 1960's it was realised that tobacco smoking was harmful to health, by the 1980's campaigns to discourage smoking were well underway (official logo designed by the International Green Cross Society)

Proof sheet showing FDI cancel in four settings in different colours so the correct position and colour could be chosen for the special cancel, for the 1993 Tonga "health and fitness" set of stamps, (see example p31)

Smoking had now been linked to cancer, heart and circulatory diseases but prevention of circulatory diseases is possible by stopping smoking and by other methods...

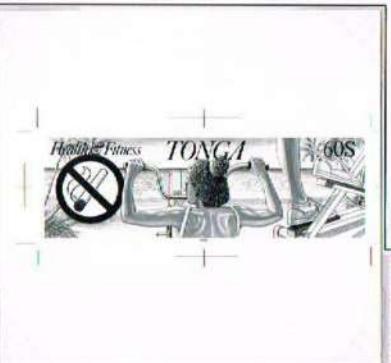

### the perils of tobacco

### 3.3. PREVENTION IS BETTER THAN CURE

Exercise is a great way of improving the circulatory system

Meter: Francotyp-Postalia, EFS3000/NEF300, specimen, without place name and code

▲ On left - photographic first proof with wrong value (60s), and issued stamp right overprinted with SPECIMEN to show what the correct value is (80s).

Mountaineering is a great way of exercising...

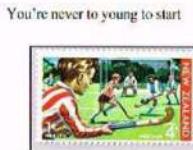

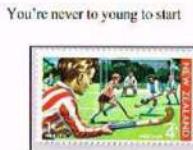

...the indigenous population of the high altitude plateau around Mt. Kilimanjaro have adapted to living at high altitude and as a result have increased the oxygen carrying capacity of their blood and thus excel at long distance running.

Herrn u. Frau  
Dr.med. M.B.-J. un  
prak. Ärzte  
4049 Neurath  
Oststr. 24

Germany

cardio-vascular disease can be prevented

You're never too young to start

...but paying the wrong fee at the gym, may raise your blood pressure as well, not a good idea!

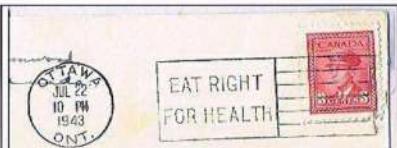

Climbing Mount Everest is perhaps excessive, high altitude is detrimental to good circulatory health, it causes the number of red blood cells to increase, resulting in a condition called polycythaemia.

Which can result in acute pulmonary oedema or cerebral oedema, as a result of local vasodilation of blood vessels resulting in greater blood flow and increased cardiac output.

### 3.3. PREVENTION IS BETTER THAN CURE

Dietary Awareness - a good diet is also essential to maintain a healthy blood circulatory system,

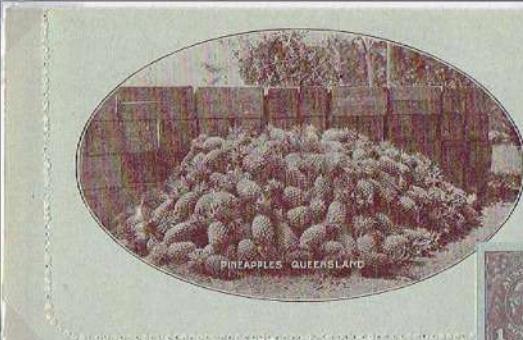

Certain foods such as coffee will stimulate the heart

Vitamins are essential for a healthy heart and blood production, fresh fruit and vegetables are a good source of these. 5 portions of fruit or vegetable is the recommended intake

Meter: Francotyp Cc.Mm

Australia pre-paid letter card

Fish oil and onion plants provide substances which help protect against heart and blood diseases

But advice on the correct diet will often be needed.

### 3.4. TREATMENT OF HEART DISEASE

Recent reports have shown that red wine provides some protection against circulatory disorders

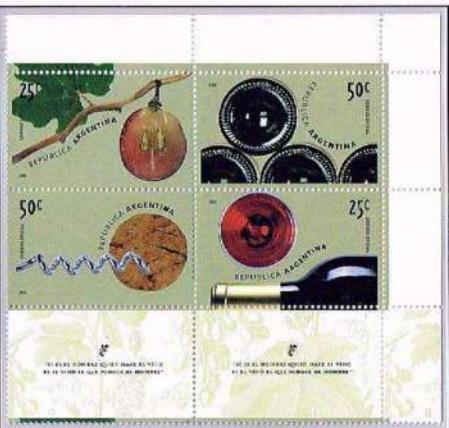

Purchased for 5 centimes  
a saving of 10 centimes  
on the normal postage rate.

This anti-alcohol message has been emphasised unintentionally by the use of a Post Office specimen overprint on lower stamp ▶

"si es el hombre quien hace el vino es el vino el que rebache al hombre" - if it is man who makes wine it is wine that tempts man but taken in moderation only, excess alcohol can lead to other health complications.

There have been numerous claims of other wonder cures circulatory diseases including marienbad tablets and siro casali for arterio sclerosis,

Austria postal stationery in German or English. Postmarked 1969 with 5 Heller stamp for letter rate and foreign mail. English version to USA, German version to Sweden

Eurozettel/Depesche für alle Zwecke der Briefmarken und Telefonkarten. Es haben die meisten Apotheken die Marienbad Tablotionen nicht vorrätig, oder wenn man sich an den General-Depositor für U.S.A. Joseph Sieke, New-York, City, Monroe Avenue, 174 Street.

Dear Sir,  
I take the liberty of reminding you of the Marienbad Tablets prepared from the prescription of Prof. Ritt. v. Basch, M. D., & of requesting you to support me as much as possible in my efforts to make this preparation known to the public at large throughout the world.

It is sufficient to try this preparation once to convince oneself of its efficiency, and I have much pleasure in placing at your disposal a free sample of it.

Yours faithfully  
C. W. Bärentin,  
G. m. b. H.

#### MARIENBAD TABLETS

prepared from the prescription of Prof. Ritt. v. Basch, M. D., of Vienna & Marienbad. The Marienbad Tablets are a cathartic act mildly & painlessly on the movement mechanism of the intestines & thus promote the evacuation of the bowels, without any disagreeable after-effects. Special stress is laid in their composition & preparation to avoid all side-effects. This Objet is attained partly by the Tabloid becoming dissolved not in the stomach but only in the intestine.

They are especially useful in cases of increased full-bloodedness with attendant dizziness, congestion headache, that is to say in cases of commencing arterial sclerosis.

As a general symptom often accompany obesity. It appears advisable to make use of Marienbad Tablets in the treatment of obesity.

The Tablets should also be used for women in case of symptoms of full-bloodedness during the pregnancy, in cases of con�ipation due to the weakness of the intestinal muscles.

Da es sehr leicht begleitet, so der Pethlebigkeit einer unterdrückten Schmerzen, die ist der Geistreich ebenso bei Hartle (Darmstone) u. störungen. Gute.

Die Marienbad Tablotionen werden nicht in den Apotheken angeboten. Sollten in den dortigen Apotheken die Marienbad Tablotionen nicht vorrätig sein, wobei man sich an den General-Depositor für Schwedische Apotheken, Nordtyskland Stockholme wenden.

### 3.4. TREATMENT OF HEART DISEASE

Diseases of the circulatory system and the heart can be treated, many different types of drugs are used:

Drugs extracted from plants and synthetically produced drugs have different effects on the heart. Plants such as the foxglove (digitalis) and ginseng stimulate the heart.

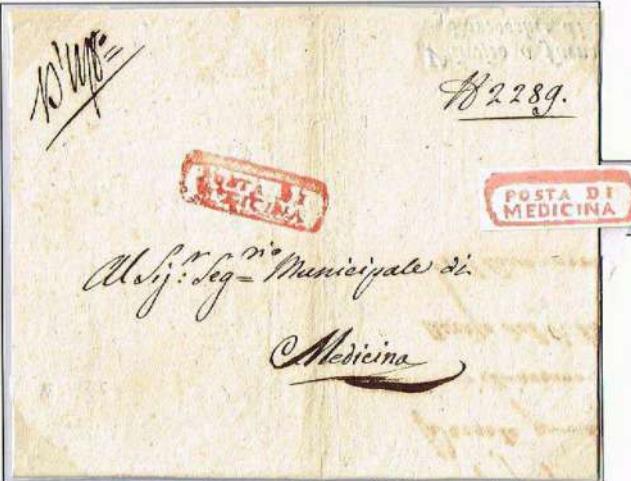

Beta blockers are used for the management of cardiac arrhythmias. Propranolol was the first clinically useful beta adrenergic receptor antagonist. Inferior anterolateral view (left side of the heart and its major blood vessels)

▲ Enlarged section of stamp

Drugs which prevent thrombosis are extensively used in the treatment of heart disease. Heparin prevents blood coagulation and thrombosis

The snake has long been associated with healing, the origins of the name Medicina (in Italian it means "medicine") is from the legend of the Emperor Frederick Barbarossa, passing through the area fell ill and miraculously recovered from this illness because of a snake that accidentally came into his pot of soup, thereafter the town was named Medicina.

▲ 1805 official mail from Castel S. Pietro to Medicina, postmarked on arrival with red framed 'POSTA DI MEDICINA'.

### Ein neuer Mensch durch HEKTOGERON - Gelée Royale.

Advertising card, with the return postage paid by the advertiser. Seibold & Co. With blue Bruckenthal postmark & red postage date stamp.

The snake's power of snake venom is illustrated by the use of the drug Arvin, which prevents thrombosis, it is derived from the venom of the Malayan Pit Viper (Aspidodrón Rhadostoma), after the venom is collected and purified.

Original artwork by Isabel for 50c and 75f issues and issued stamp

when the heart fails there is every chance

#### 3.4. TREATMENT OF HEART DISEASE

Aspirin inhibits blood cell platelets (thrombocytes).

Originally extracted from the leaves and bark of the willow tree by Felix Hoffman.

Initially marketed through Bayer in 1899, aspirin was primarily used for pain relief by inhibiting localised hormones such as prostaglandin which produce pain and inflammation following injury.

It became a generic drug in 1930 when the Bayer patent expired, it is now known by a variety of names...

#### aspirin - the most common drug

#### 3.4. TREATMENT OF HEART DISEASE

Drugs may not always be effective, it may then become necessary for heart surgery.

but if the valve is not correctly placed then further surgery such as...

...the placement of a stent to ensure free blood flow may be necessary

However, if the above procedures are unsuccessful then a heart transplant maybe necessary

Official Postal stationery view card printed 1927. Updated ½d to Germany - a due charge of ten centimes was applied, as rate abroad required an additional 1d

.. leading to the first heart transplant operation at the Groot Schuur Hospital, by Christiaan Barnard

colour error

Stephen Boon, Britains longest surviving heart transplant, it would lead him to winning an International Gold Medal in thematic philately.

However, for a successful heart transplant, the donor heart must be healthy, this donor heart does not look a healthy colour.

However, a healthy heart, requires a healthy blood supply...
